Partner with Ecosure to streamline your construction project

Ecosure is one of Australia's largest ISO certified Environmental Consultancies offering government and the private sector world-class solutions to complex environmental problems.

We understand the importance of delivering safe, timely and cost effective services to achieve project targets

Ecosure's reputable Environmental Management Plans

- Streamlined process
- Ongoing support
- Superior communication
- Direct access to 90 environmental specialists
- Legislative compliance
- Ongoing negotiation assistance during operational works stage

Trust Ecosure to help achieve your project using our renowned environmental expertise

Monitoring, management and on-ground works for:

- Fauna, including spotter catcher and nestbox installation
- Vegetation
- Pest flora and fauna
- Waste
- Water quality
- Sediment and erosion control
- Cultural heritage management
- Acid sulphate soil
- Air quality
- Vibration and noise

Assisting to achieve environmental compliance for:

- Chemical and fuel storage and use
- On-site machinery
- Road transport
- Site facilities
- Clearing and grubbing

Working with you to minimise environmental impact and costly unforeseen challenges

Customer Satisfaction

“Ecosure have been thorough and professional in all aspects of their engagement by CMC at Halfway Creek to Glenugie Pacific Highway Upgrade. This extends to: the quality of expert ecological and soil amelioration advice, reporting, safety documentation and implementation of safety systems, time management (ie deliverables on time) and accessibility for ongoing advice.”

“I would recommend Ecosure as a quality full service ecological consulting provider.”

Martin Mulhearn
Environment Manager for
Halfway Creek to Glenugie
Pacific Highway Upgrade
CMC Group

Environmental assessment for major road upgrade

Ecosure was engaged to identify potential ecological impacts and offset requirements for a major road upgrade. After completing terrestrial flora, fauna and aquatic ecology assessments our team provided recommendations to help our government client foresee possible environmental legislative triggers. The client was full of praise for Ecosure's efforts and highlighted the team's ability to meet strict deadlines, communicate effectively and provide concise reporting.

Fauna spotter catching for a major rail construction

A multinational property and infrastructure development company engaged Ecosure to provide fauna spotter catcher services for the construction of a 26km stretch of rail duplication in Central Queensland. Ecosure conducted a pre-clear survey of the entire rail corridor to identify animal habitat features that would be impacted by clearing activities. During this phase fauna spotter catchers were provided for each clearing machine and animals impacted by the clearings were safely relocated to suitable habitat. Ecosure developed all required reporting for regulatory agencies.

“The koala contract is one of the more difficult contracts under the Threatened Species panel on the Woolgoolga to Ballina Project. Ecosure continues to deliver a high level of service against this contract in a professional and cooperative manner.”

Mark Cowan
Roads and Maritime Services

Construction environmental management services

Ecosure worked with a national company to prepare multiple environmental management plans for the construction of a major bypass project. These sub plans fell under an overarching CEMP and covered sediment and erosion control, flora and fauna, dust and air quality, waste and water quality.

Environmental compliance monitoring

Over the past decade, Ecosure has provided environmental compliance monitoring for various construction projects including a runway extension, at an International Airport. The scope of these services vary from the provision of a full time compliance officer, for an extended period of time, to daily or monthly inspections on projects with fewer environmental regulatory requirements. Ecosure continues to work with this client carrying out inductions, training and general education to improve environmental awareness amongst contractor staff.

With more than 90 environmental specialists on the team, Ecosure can provide any civil construction project with a full-time Environmental Site Representative to streamline your project

Environmental planning, including construction environmental management plans (CEMPs)

- Development approval applications and legislation compliance assessments.
- Identification of baseline environmental values, including flora, fauna and aquatic pre-clear surveys, mapping, habitat assessments, impact statements and species management plans.
- Tailored CEMPs for construction and operational phases, covering all aspects of environmental management.
- Highly skilled fauna spotter catchers with all required equipment, safe work systems and experience on major projects.

Environmental site representatives

- On-site expert in environmental management.
- Dedicated to working collaboratively with our client to avoid costly hold points.
- Highly experienced in interpretation of legislative requirements.

Compliance monitoring and maintenance

- Compliance monitoring against CEMP requirements.
- Provision of environmental inductions and tool box talks to construction staff.
- On-ground vegetation management, weed control and maintenance activities.
- Experience and relevant permits to trap, restrain and relocate problem wildlife, as well as having capacity to take tissue samples and access our in-house veterinarian staff for specialist technical support.

Restoration and offsetting

- Environmental offset planning and implementation.
- Revegetation and maintenance including full habitat reconstruction on large and small scales.
- Qualified and experienced bush regeneration teams that come fully equipped with 4WD vehicles and all the necessary specialised equipment for sensitive and successful restoration works on any site.
